STATEOF BUSINESS.

No Alarm Should be Felt Over Tem porary Stringency of Money.

BARRIER TO GOLD EXPORTS

Result of the Elections Satisfactory to Those Who Believe in Sound Money. Bank Clearances and Railroad Eurnings Keep Pace With Trade Advances in Every Section-Wool Still Going Up.

Special Correspondence of Intalligencer. NEW YORK, Nov. 11.—The stock market continues in a somewhat wait-ing attitude. Buying is held in check by money market conditions. Until these become more favorable any extensive bull movement that may be inaugurated is likely to meet with serious resistance. As for the future of the money market, funds are likely to reurn from the interior more slowly and in less amount than usual, Industrial and commercial activity insure a good demand for funds for some little time to come. Meanwhile, the treasury continues to absorb money, adding to gen eral stringency, from which the only relief in sight is its return from the interior or the purchase of bonds by the government. This latter device has been resorted to before to counteract the ill effect of treasury operations, and there is no doubt that Secretary Gage will buy bonds when conditions fully warrant doing so. It is useless, however, to expect the secretary, who is an astute financier, to undertake any method purely for the benefit of speculative operations. In my opinion, a fairly good interest rate for money just now is beneficial, as it acts as a barrier against gold exports. The situation is so unusually favorable in most re-spects that excessive speculation might asily be precipitated upon the country which would mean a violent and per haps prostrating collapse later Stiff rates for money are financial brakes; and at a slower pace the market can more safely respond to bullish influences. Money should soon begin to return, resulting in rising bank averages. No alarm need be felt should the reserve temporarily fall below legal requirements. The safety line is ample enough to avert all danger; and the law is so designed as to give banks sufficient time to strengthen their reserves before the comptroller, who has large discretion, can take ac-

The elections had little effect. Their results, however, were eminently satisfactory to those who believe sound moncy and commercial expansion necessary for the country's progress and presperity. Of course in the next national election Mr. McKinley and Mr. Bryan will again be rival candidates. That is the natural sequence of Tuesday's elections; but no same individual has any misgivings about the outcome. The administration has already been well sustained, continued prosperity will strengthen its hold upon popular imagination; and the discontent upon which Mr. Bryan's fallacles chiefly thrived is now a thing of the past. Facts and circumstances are against any serious revival of Bryanism.

Bank clearings and railroad earnings both emphatically remind us of the phenomenal advances which the country is making. Activity prevails in almost every trade and in every section of the land. New enterprises are springing up; some to supply new wants; others to meet the great demand for manufactured goods. The railroads are obliged to face increased expenses; but advances in rail rates and heavy traffic promise continued large net returns, and the ranks of dividend-payers are likely to be increased. Railroad securities still constitute one of the safest forms of investment, and some of the low priced issues are likely to score good advances during the next six months. The industrials often making extraordinary profits; but these cannot continue when in-creased competition begins and trade demands assume normal proportions.

An important difference between the former administration and the present one is that the previous one had such a depleted treasury, due to the continuus bad times: that the was compelled to be a constant seller of bonds; while the present one, due to the continuous bad times; that the government was compelled to be a constant seller of bonds: while the present one, due to good times prevailing, has an excess of money in its vaults, the locking up of which is retarding the prosperous business of the entire country. To admit of this money getting out of the treasury, the government would certainly be justified in buying up some of the very bonds that were sold during the last adminitsration, and, as the money paid out therefore could be advantageously employed by the American enterprising people, it would doubtless be a sagac lous policy to adopt, besides making the contrast a very marked one beadministrations.

The low reserves of the New York the low reserves of the New John banks is an evidence of the commercial and industrial activity of the country. As is well known, the Associated Banks of New York are below the 25 per cent reserve required by law This very large reserve is only impera-tive by law upon the National banks. The banks organized under the state law are only required to keep a 15 per

cent reserve.

Quite a number of state banks, are in the New York Clearing House Associa-tion, and by a rule of the association, the reserve is counted at 25 per cent on all the banks alike. If the state banks were classed at 15 per cent and the Nation banks at 25 per cent it would give the latter an excess in reserve of the legal 25 per cent. There is, therefore nothing to disturb confidence in the last week's bank statement, which showed the banks to be \$338,350 below their reserves. The money that has recently gone from New York banks has been needed for payrolls and pocket money, which in the aggregate was never so large as now, and applies alike to every section of the country. The average amount of money carried

in the pockets of people, estimated at \$5 each, which is comparatively small amount, is \$275,000,000. The New York bank reserves, estimated at 25 per cent now call for \$188,900,000. The reserves of other large cities are about in the represent so much money out of circulation. The same is the case with the large sum now held by the United States treasury, the amount being

The present activity and high rates for money simply give the opportunity for the banks to loan funds out liberally, as it is through interest rates that money is obtained for dividends rates to the stockholders of the institutions, and as the activity in money at the present time is caused by prosperity they feel justified in putting There never was a time they can. when it was safer to do it.

HENRY CLEWS.

Wool Bradstreets: The wool market con-tinues very firm and prices have advanced during the past week from one to two cents per pound. Boston's sales for the week were a little over 12,000, 000 pounds, as against 18,000,000 pounds for the previous week. The business past three weeks foots up to over \$45,000,000 pounds, which is largest business ever before experi-enced in that market. As was the case last week, most of the business was done in territory, Texas and Oregon wools, although other domestic grades have been well dealt in. The demand is active both for consumption and for speculation. A good deal of wool is being exported to England, where dealers can obtain better prices than they are being offered here. Stocks have been considerably reduced by the large tranactions of late, although receipts have been heavy, and some dealers that the quantity of wool on the market is already down to where it usually is just before the arrival of the new clip. Everything points to a still higher market.

FINANCE AND TRADE.

The Features of the Money and Stock

Markets.
NEW YORK, Nov. 11.—To-day's bank statement proved rather worse than the most extreme estimates had foretold. The loss in cash reserves ran up to The loss in cash reserves ran up to \$5,217,400, whereas the extreme estimate had been for only \$4,500,000. Some sanguine persons had hoped that the cash losses would be offset by a loan contraction, as high as \$12,000,000. Instead of that the decrease in loans reached only \$7,151,100. As this only reduced the reserve requirements to the extent of \$3,768,800, the cash losses have resulted in increasing the deficit below legal resulterment to \$2.500. It was not to quirement to \$2,788,950. It was not to be expected that so formidable an en-croachment on the already depleted re-serves of the banks should be without effect and prices gave way all around. effect and prices gave way at a calculate the losses in the railroad list are strikingly small, in spite of a large volume of dealings. This department offered a stubborn resistance to the pressure and there were evidently heavy buying orders to be executed. In the specialities, especially those recently active in speculation, the losses were more se-

In Sugar, the coalers, the local trac-In Sugar, the coalers, the local tracdion stocks, especially Manhattaa, Tobacco and Tennessee Coal, there were
wide breaches in prices. Even in these
the bears were eager to cover at the decline, and some sflarp rallies were
achieved. As loans made on Friday on
the stock exchange carry over till Monday, the money market was nominal.
Liquidation was in anticipation of Monday's money merket, and was not forced
by actual calling of loans. Yesterday's
large calling of loans is probably not
fully reflected in the statement, so that
the actual condition of the banks may
be slightly better than indicated, but the
course of the money movement makes
the necessity of further loan contraction a practical certainty. The foreign
exchange market, like the money marexchange market, like the money mar-ket, is almost wholly nominal on Sat-urday, but the nominal rates for sterling were marked down an additional half

cent.

By Monday morning last, the operations in stocks had recovered largely from the fright occasioned by the showing in the Saturday bank statement of a deficit in the required cash reserves of the banks. They were soothed by a specious explanation that the statement made the showing worse than the actual the banks. They specious explanation that the statement made the showing worse than the actual condition warranted, owing to the necessary rectification of an error in the statement of October 28. The admission of an error in the showing and the fact that the statement was withheld from publication until two minutes before the close on Saturday last were made the occasion for criticism in Wall street and in the revuision of speculative feeling opinion rushed to the other extreme of over-confidence in the money outlook. Traders in stocks generally seek to anticipate a certain amount of outside

over-confidence in the money outflow. Traders in stocks generally seek to anticipate a certain amount of outside buying which comes into the market after an election, owing to the relief from the unsettling influences on business of a political campaign. There was professional buying of stocks on Monday with this object and a resulting advance in prices. There was also some outside demand, on Wednesday, as was expected. But it proved insuffificient to absorb the offerings.

The large buying by the bear element during the previous week had resulted in eliminating much of the short interest from the market and its technical position was thereby weakened. The course of events in the money market demonstrated that the hopes of a realization during the previous week had been illusive. New York exchange, which had hardened at various points and at Chicago had risen to ten cents premium per thousand, eased off again in the latter instanct to a discount.

Breadstuffs and Provisions.

CHICAO-Wheat to-day went even lower than yesterday's bottom price. closing 4@%c lower on bearish statis

closing 46%c lower on bearish statistics and lack of cash demand. Corn closed unchanged to ½c down and oats a shade lower. Provisions closed lower; January pork 7½c lower.

The story of wheat to-day was one of continuous liquidation, based on the bearish tone of statistics. The down hearted bulls let their holding silde in a despondent stream. The decline was in spite of Liverpool, The opening was at a shade loss, December at \$75%667%c, and May at 71%671%c. This in spite of Liverpoot. The opening was at a shade loss, December at 6715.67%c, and May at 714.671%c. This was the highest price for the day. Receipts in the northwest were liberal; there was a prospect of an increase in the visible of 2,000,000 bushels and in local stocks of 1,000,000 bushels. The cash demand was small and after the opening impulse the market eased on from the opening, going %c under puts. December to 67%c and May to 71c. There was a momentary rally, a shade on buying against puts, but it was merely a straw in the downward rush. At the close there was continued buying against puts and some covering by shorts which put closing figures at 57%c for December and 71%c for May. The market was dull on a bellef that the price would sink still more Monday when statistics are expected to be bearish. New York reported fifteen loads taken for exports. Clearances were liberal, 631,000 bushels. Receipts at primary points were 1,017,000 bushels against 1,538,860 last year. Minneapolis and Duluth reported receipts of 1,039,as compared with 723 last week and 1,229 a year ago. Receipts here were 86 cars, 28 of which were of contract 1,229 a year ago. Receipts here were 86 cars, 28 of which were of contract

cars, 28 of which grade.

Corn stubbornly opposed traveling parallel with wheat. In this it was assisted by statistics. There was a report of damages from frost and dry hard and layerpool and the corn of the co sisted by statistics. There was a port of damages from frost and dry weather in Argentine and Liverpool was firm. There was a difference of opinion concerning country offerings, but a majority apparently held that they were still small and not increasing. December opened, unchanged at 31½6731%; ranged to 31½6731%; ranged to 31½6731%; and closed at 31½6731%. May opened a shade down at 32½6; ranged 32%672%; and closed at 62%672%; Receipts here were 301 cars; at primary points 457,000 bushels. The government report was taken to indicate an improve-

and closed at 62%62%c. Receipts here were 231 cars, at primary points 457,000 bushels. The government report was taken to indicate an improvement in the yields. New York reported thirty loads taken for export. There was quite a good trade in oats, the selling of May by professionals and commission people being the feature. The demand was sufficient to consume the offerings, however. May sold at 23%623%c, closing at that price. Receipts were 152 cars.

Provisions were a dull market and the price tended downward with wheat. January pork closed 7½c lower at 43 66. January lard 2½c under yesterday's close at 35 22½ and January rbs 6c lower at 34 95. There were few offerings and little demand and exports for the week showed up bad. Hog prices were also lower, a fact which had a depressing influence.

Estimated receipts Monday;
Wheat, 110 cars, corn, 300 cars; oats, 250 cars; hogs, 41,000 head.

The leading futures ranged as follows:

His Life Was Saved.

Mr. J. E. Lilly, a prominent citizen of Hannibal, a.o., lately had a wonderful deliverance from a frightful death. In telling of it he says: "I was taken with typhold fever, that ran into pteumonia. My lungs became hardened. I was so weak I couldn't even sit up in bed. Nothing helped me." I expected to soot die of consumption, when I heard of Dr. King's New Discovery. One bottle gave great relief. I continued to use it, and now am well and strong. I ean't say too much in its praise." This marvellous medicine is the sureat and quickest cure in the world for all throat and lung trouble. Regular sizes 50 cts. and \$1.96. Trial bottles free at Logan Drug Co.'s drug store; every bottle guaranteed.
